### **ABSTRACT OF DISSERTATION**

This research study investigates the use of technology in the primary school classroom. It seeks to ascertain if technology is worth the investment at this level. The dissertation is divided into five chapters.

The first chapter introduces the topic and outlines the research questions.

The second chapter incorporates a literature study focussed on technology at primary school level.

The third chapter discusses research methodology and outlines reasons for the choice of the research instrument being used in this survey.

The fourth chapter presents the results of the study and discusses them within the context of the earlier literature study.

The final chapter gives the conclusions and outlines further areas for research within the broader context of technology in the primary school classroom.
